Ghost allows you to inject code into the top and bottom of your theme files without editing them. This allows for quick modifications to insert useful things like tracking codes and meta tags.

Site Header

Code here will be injected into the `{{ghost_head}}` tag on every page of the site

1

Site Footer

Code here will be injected into the `{{ghost_foot}}` tag on every page of the site

This is a testing ground for new or experimental features. They may change, break or inexplicably disappear at any time.

Members

- Create registered members and take subscription payments
- Configure

MIGRATION OPTIONS

Import content

- Import posts from another Ghost installation
- Seleccionar archivo Ninguno archivo selec. Import

Export your content

- Download all of your posts and settings in a single, glorious JSON file
- Export

Delete all content

- Permanently delete all posts and tags from the database, a hard reset
- Delete

BETA FEATURES

Night shift

- Swap Ghost admin's colours to a dark background which is easy on the eyes
- Toggle

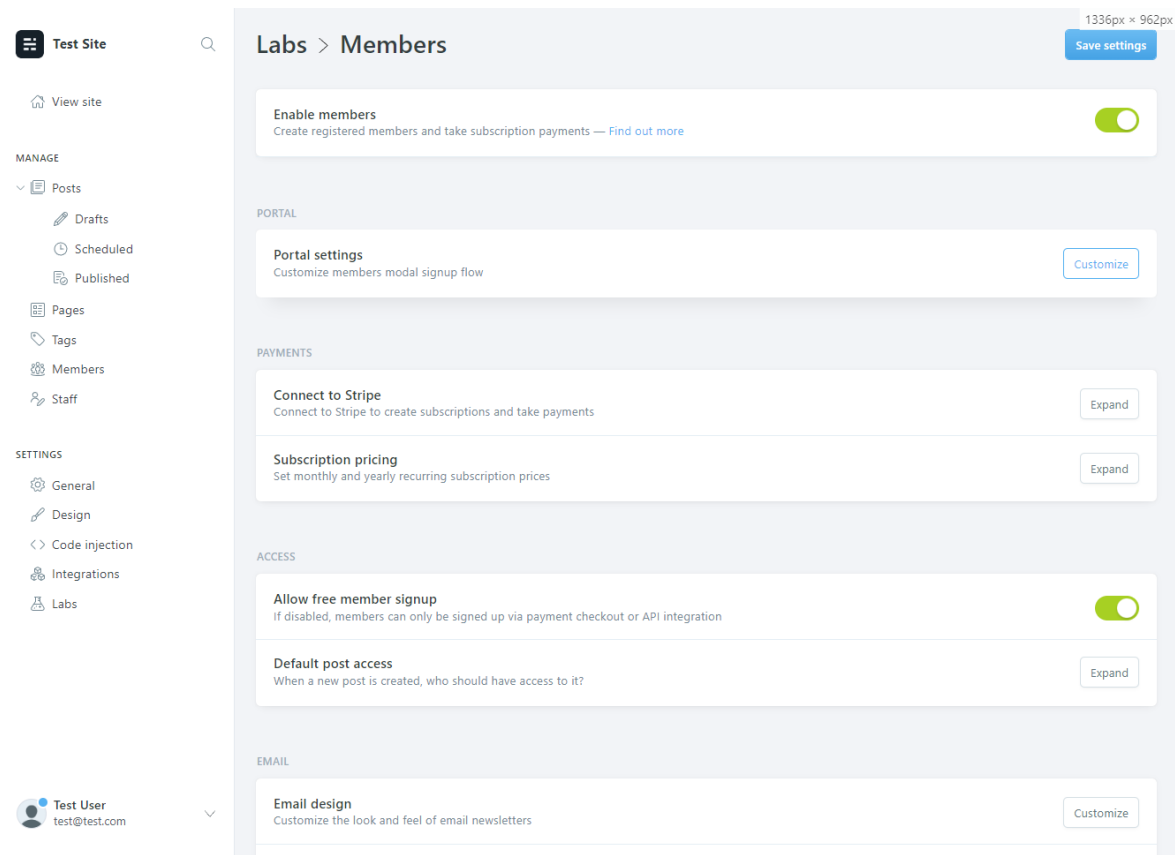

Redirects

- Configure redirects for old or moved content, more info in [the docs](#)
- Upload redirects JSON
- Download current redirects

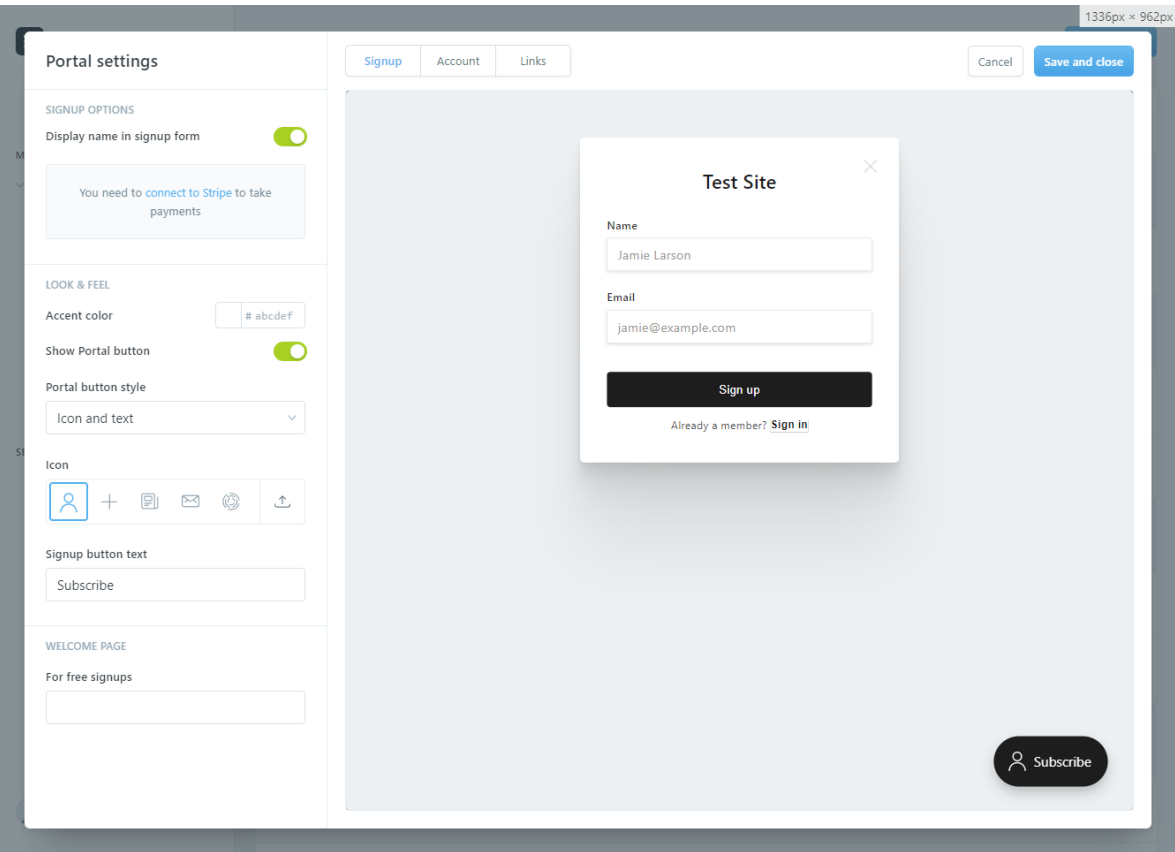

Routes

- Configure dynamic routing by modifying the routes.yaml file
- Upload routes YAML
- Download current routes.yaml
